CATEGORY	Coverage Indicator	Order PREFERRED DRUGS	Coverage Indicator	Step Order	NON-PREFERRED DRUGS PA Required		Criteria
PDL Effective August 12, 2024							
*PLEASE NOTE: For a search	box nit Ctrl F						
* PLEASE NOTE: All cost effe	ctive generic	s applicable to DEL are considered PRE	FERRED D	rugs. '	"BASIC" Covered Drugs are bolded with the	e Coverage Indicator	of "MC / DEL".
General Criteria for all PDL categories- Fo	r more information	or help using the PDL, providers may call 1-888-445-04	97; members s	should cal	II 1-866-796-2463. To access PDL and PA materials via the	internet: www.mainecarepd	lorg
A: Preferred Drugs- Unless otherwise spe	cified, preferred dru	ugs are available without prior authorization. Step orde	r may apply fo	r preferre	d drugs in some drug categories as indicated on the PDL.	(See item "D" below for exp	lanation of step order.)
etc.); 3. Certain drug trials, such as with c	ontrolled substance		actually tried (	example:			on a case-by-case basis; 2. A trial will not be considered valid if preferred or non-preferred products were readily available (by override, individual purchase, samples, S with no lower threshold); 4. Adequate trials require documentation of attempts to titrate dose of preferred agents toward desired clinical response. 5. Adequate trials
D: <u>Step Order</u> - When numbers appear in t	he "step order" col	umn, it means drugs in this category must be used in t	he order specif	fied, with	the lower numbers having preference over the higher num	bers. Chart notes should be	provided to confirm drug trials that do not appear in the member's MaineCare drug profile.
E. The Department will institute strategies categories will require prior authorization			t Preferred bra	and drugs	will no longer be preferred in any PDL drug category when	re preferred generic drugs a	re also available. It is expected that preferred generics will be used prior to any preferred brands. This will be operated as a form of step care. Preferred brands in these
							ed generic equivalent available, the most cost effective medically necessary version will be approved and reimbursed, since the brand-name and A-rated generic drugs he proper role of the FDA. Physicians should submit their reports of generic inequivalence directly to the FDA via the MEDWATCH.
G: <u>PA requests for non- FDA Approved In</u> controlled randomized clinical studies est			ommittee is ab	le to revie	ew the evidence and make a recommendation. Interim app	rovals and DUR recommend	ations for approval of a drug for a non- FDA approved indication will require a minimum of two published, peer reviewed, non contradicted, double- blind, placebo-
H: <u>Dose Consolidation Requirements</u> - Sor	ne drugs may also	be affected by dose consolidation requirements. Pleas	e see Dose Co	nsolidatio	on List and/or Splitting Tables provided in the PDL.		
I. <u>Trials from Multiple Drug Classes</u> - Tria	l/failure/intolerance	to preferred agents from multiple classes within the sa	ame category o	or other ca	atagories of drugs may be required prior to the approval of	non-preferred agents (e.g., (	Cymbalta, Zofran, Elidel and others).
J. <u>Drug-specific PA Forms</u> - Drug-specific	PA forms contain r	nedical necessity documentation requirements and/or o	criteria that ma	iy not be i	repeated in the PDL. Drug-specific PA forms may be obtain	ned on the web at <u>www.main</u>	ecarepdl.org .
					cemption from prior authorization requirement for certain c apt will be required to do so, and criteria for approval of that		y demonstrate high compliance with the Department's PDL. The Department will notify providers in writing which drug categories are included and what dates apply to the met.
L: <u>Drug-Drug Interactions (DDI)</u> - The DUR	Committee has imp	plemented new drug-drug interation edits requiring prio	r authorization	. Several	drug-drug combinations and PDL drug catagories are affe	cted by new PA requirement	s. These will be indicated in the PDL with DDI notation. Please see the DDI document provided in the PDL.

# **Pain Management Policy**

# Back to Index

Beginning January 2017, all current opiate users who are above the maximum combined daily dose of 100 MME must titrate their total daily dose of opioid medications below 300 MME. Also, the maximum daily supply of an opiate prescription for acute pain will be limited to 7-day supplies. The maximum day supply of an opiate prescription for chronic pain will be limited to 30-day supplies. As of July 1, 2017 all users of opioid medications must comply with the maximum combined daily dose of 100 MME.

However, for MaineCare members, effective January 1, 2017, opioid prescription(s) for more than a 7-day supply and/or more than 30 MME/ day will require a prior authorization. Please note that MaineCare implemented a 30 MME limit January 1, 2013 that is still effective.

The following are general exceptions: pain associated with cancer treatment, end-of-life and hospice care, palliative care, and symptoms related to HIV/AIDS. Per MaineCare criteria, the diagnosis of cancer must be written on the prescription. A palliative care exception for any MaineCare opioid prescription will require prior authorization (PA) with appropriate clinical documentation.

Post-surgical members may receive prior authorizations for opiates up to a 60 days in length if medical necessity is provided by the surgical provider.

An MME conversion chart is available at www.mainecarepdl.org. Click on "General Pharmacy Info."
