CATEGORY	Coverage Indicator	tep Order	PREFERRED DRUGS	Coverage Indicator	Step Order	NON-PREFERRED DRUGS PA Require	d	Criteria
PDL Effective November 8, 2024 *PLEASE NOTE: For a search	h box hit Ctrl	F						
* PLEASE NOTE: All cost ef	fective gene	rics appl	icable to DEL are considered PRI	EFERRED	Drugs. '	"BASIC" Covered Drugs are bolded w	rith the Coverage Indicator	of "MC / DEL".
General Criteria for all PDL categories-	For more informa	tion or help	using the PDL, providers may call 1-888-445-	0497; members	should cal	II 1-866-796-2463. To access PDL and PA materials	via the internet: www.mainecarepo	l.orq
-						d drugs in some drug categories as indicated on the		
							(444.44	
etc.); 3. Certain drug trials, such as with	controlled subst	ances, may		re actually tried	d (example:			on a case-by-case basis; 2. A trial will not be considered valid if preferred or non-preferred products were readily available (by override, individual purchase, samples, S with no lower threshold); 4. Adequate trials require documentation of attempts to titrate dose of preferred agents toward desired clinical response. 5. Adequate trials
D: <u>Step Order</u> - When numbers appear i	n the "step order	" column, it r	means drugs in this category must be used in	the order spe	cified, with	the lower numbers having preference over the high	ner numbers. Chart notes should be	provided to confirm drug trials that do not appear in the member's MaineCare drug profile.
E. The Department will institute strategi categories will require prior authorization				efit Preferred b	orand drugs	will no longer be preferred in any PDL drug category	ory where preferred generic drugs a	re also available. It is expected that preferred generics will be used prior to any preferred brands. This will be operated as a form of step care. Preferred brands in these
								ed generic equivalent available, the most cost effective medically necessary version will be approved and reimbursed, since the brand-name and A-rated generic drugs he proper role of the FDA. Physicians should submit their reports of generic inequivalence directly to the FDA via the MEDWATCH.
G: PA requests for non- FDA Approved controlled randomized clinical studies of				committee is a	able to revie	ew the evidence and make a recommendation. Inte	rim approvals and DUR recommend	ations for approval of a drug for a non- FDA approved indication will require a minimum of two published, peer reviewed, non contradicted, double- blind, placebo-
H: <u>Dose Consolidation Requirements</u> - S	Some drugs may a	also be affec	ted by dose consolidation requirements. Plea	ase see Dose (Consolidatio	on List and/or Splitting Tables provided in the PDL.		
I. Trials from Multiple Drug Classes - To	rial/failure/intolera	ance to prefe	erred agents from multiple classes within the	same category	or other ca	atagories of drugs may be required prior to the app	roval of non-preferred agents (e.g.,	Cymbalta, Zofran, Elidel and others).
J. <u>Drug-specific PA Forms</u> - Drug-specific	fic PA forms cont	ain medical	necessity documentation requirements and/o	r criteria that r	nay not be r	repeated in the PDL. Drug-specific PA forms may t	pe obtained on the web at <u>www.mair</u>	ecarepdl.org .

CA (cancer) or HO (hospice) diag code may be used but store must verify since all scripts will be audited and stores will be liable. 2. Established users are grandfathered. 3. Oxycodone ER allowed only 2 per day for all strengths except 80 mg,	of the preferred arug or a significant potential arug interaction between another arug & the preferred arug(s) exists. Adequate trials include prevention/treatment or common adverse effects associated w/ narcotics (antinausea, antipruritics, etc.) as well as adequate equianalgesic dosing when converting from one narcotic to another. Also, adequate documentation of attempts to litrate dose of preferred agents to achieve adequate pain relief & desired clinical response must be provided. Member's drug regimen for additions &/or discontinuations of medications that may affect absorption &/or metabolism of preferred agents must be monitored. Approvals will not be granted if patient had access to either non-preferred products or high doses of short acting narcotics during the trial period. Non-preferred drugs will not be approved for patients showing evidence of usage patterns consistent w/ controlled substance abuse such as: 1.Frequent or persistent early refills of controlled drugs; 2.Multiple instances of early refill overrides due to reports of misplacement, stolen, dropped in toilet or sink, distant travel, etc.; 3.Breaches of narcotic contracts with any provider; 4.Failure to comply with patient responsibilities in attached opioid documentation (see PA form) including but not limited to failing to submit to and pass pill counts; 5.Failing to take or pass random drug testing; 6.Failing to provide old records regarding prior use of narcotics; 7.Receiving controlled substances from other prescribers that the provider submitting the PA is unaware of 8. Documented history of substance abuse. Substance abuse evaluations may be required for patients with medical records displaying documented substance abuse or potential signs of narcotic misuse and abuse such as chronic early refills, short dosing intervals, frequent dose increases, multiple lost/stolen etc scripts and intolerance or "allergy" to all products but Oxycontin.
			MC/DEL	8 9	OXYCODONE ER ^{3,5}	5. Non-preferred products	9. Circumventing MaineCare prior authorization requirements for narcotics by paying cash for affected narcotics (prescribers failed to submit prior authorization prior to cash narcotic scripts being filled by member). 10. Requests for any Brand name controlled substance, considered by authorities to be highly abused and diverted (Oxycontin, Percocet, Typox, Vicodin, Dilaudid, Ultracet) with an available AB rated generic equivalent will be denied unless it will be provided in a setting that virtually eliminates the risk of diversion. 11. Allergic reactions to any product within a specific narcotic class will justify and preclude use of any other product in the same class due to the risk of cross-hypersensitivity. Hysingla ER- Concomitant use should be avoided with mixed agonist/antagonist analgesics, partial agonist analgesics, and MAOIs. Verify prior trials and failures or intolerance of preferred treatments Methadone – Established users must have a trial and failure of at least 2preferred drugs for least 2 weeks. Otherwise they will be allowed 180 days to transition to a preferred product.
NARCOTICS - SELECTED	MC/DEL MC/DEL	TRAMADOL/APAP TABS	MC/DEL MC MC MC MC MC MC MC MC	7 8 8 8 8 8 8 8 9	RYZOLT BUPRENEX SOLN BUTORPHANOL NALBUPHINE HCL SOLN QDOLO SOLN SEGLENTIS¹ STADOL NS SOLN TRAMADOL ER ULTRACET TABS¹ ULTRAM ER	Use PA Form# 20420 Use PA form #10300 for PAs over the opiate limit 1. Only available if component ingredients are unavailable.	Preferred drugs from this and other narcotic classes must be tried for at least 2 weeks each and failed due to lack of efficacy or intolerable side effects before non-preferred drugs from this class will be approved, unless an acceptable clinical exception is offered on the Prior Authorization form, such as the presence of a condition that prevents usage of the preferred drug or a significant potential drug interaction between another drug and the preferred drug(s) exists. Approvals will not be granted if patient had access to either non-preferred products or high doses of short acting narcotics during the trial period. Substance abuse evaluations may be required for patients with medical records displaying potential signs of narcotic misuse and abuse such as chronic early refills, short dosing intervals, frequent dose increases, multiple lost/stolen etc scripts and intolerance or "allergy" to all products but desired product. Allergic reactions to any product within a specific narcotic class will justify and preclude use of any other product in the same class due to the risk of cross-hypersensitivity. Non-preferred drugs will not be approved for patients showing evidence of usage patterns consistent with controlled substance abouse such as: 1.frequent or persistant early refills of controlled drugs; 2.multiple instances of early refill overrides due to reports of misplacement, stolen, dropped in toilet or sink, distant travel; 3.breaches of narcotic contracts with any provider; 4.failure to comply with patient responsibilities in attached opiod documentaion (see PA form) including but not limited to failing to submit to and pass pill counts; 5.failing to take or pass random drug testing; 6.failing to take or pass random drug testing; 6.failing to provide old recoreds regarding prior use of narcotics; 7.receiving controlled substances from other prescribers that the provider submitting the PA is unaware of in Substance abuse evaluations may be required for patients with medical records displaying poten

		•		İ			1
							Beginning January 2017, all current opiate users who are above the maximum combined daily dose of 100 MME must titrate their total daily dose of opioid medications below 300 MME. Also, the maximum daily supply of an opiate prescription for acute pain will be limited to 7-day supplies. The maximum day supply of an opiate prescription for chronic pain will be limited to 30-day supplies. As of July 1, 2017 all users of opioid medications must comply with the maximum combined daily dose of 100 MME.
							However, for MaineCare members, effective January 1, 2017, opioid prescription(s) for more than a 7-day supply and/or more than 30 MME/ day will require a prior authorization. Please note that MaineCare implemented a 30 MME limit January 1, 2013 that is still effective.
							Post-surgical members may receive prior authorizations for opiates up to a 60 days in length if medical necessity is provided by the surgical provider.
							An MME conversion chart is available at www.mainecarepdl.org. Click on "General Pharmacy Info."
							Please see the Pain Management Policy tab for the complete criteria

							-The member has a significant intolerance of, or documented allergy to, sublingual buprenorphine (either buprenorphine monotherapy or buprenorphine/naloxone combination therapy) that has resulted in the patient's inability to comply with continued treatment using the sublingual product. (A true allergy is usually accompanied by rash, respiratory symptoms, or anaphylaxis. Other complaints such as bad taste, mouth tingling, etc. do not constitute evidence of allergy or significant intolerance. Formulation preference or convenience are not, in and of themselves, indications for using XRB.) -The member is in ongoing treatment with XRB and would like to continue the medication.
							-The member has experienced significant medical complications of OUD and/or of injection drug use. Occurrence should be in the last 5 years, or it should be clearly documented that the risk indicated by this infection or complication is ongoing (Examples of medical complications of OUD include: threatened the function of organs or life or limb threatening and required medical and/or surgical therapy. Examples of medical complications of injection drug use include osteomyelitis, endocarditis, renal failure, joint infection or other serious medical complications directly related to OUD.) -The member has treatment-resistant OUD, including those with ongoing illicit substance use in the context of sublingual buprenorphine treatment as documented by positive urine drug screens or other clear objective evidence, and/or further functional decline with explicit documentation of the functional decline.
							AND at least one of the following is true: -The member's previous use of sublingual buprenorphine has included misuse, overuse, or diversion. -The member is at high risk of overdose (e.g., individuals leaving incarceration or abstinence-based treatment programs; individuals who are unhoused; or those facing potential gaps in care due to delays in care or geographically limited treatment access).
							-XRB is being used for the treatment of OUD (rather than pain or any other non-FDA approved indication) and -member's total daily dose of sublingual buprenorphine is less than or equal to 24 mg daily.
						LAteriaea Merease	Brixadi and Sublocade: The prescriber can attest (and medical record should document) that: -member has a documented history of opioid use disorder (OUD),

MODIFIED ENVARSUS XR NEORAL CAP PROGRAF CAPS REZUROCK ¹ ZORTRESS HYFTOR ^{1,2}	years and older with chronic graft-versus-host disease (chronic GVHD) after failure of at least 2 prior lines of systemic therapy Use PA Form# 20420	on the Prior Authorization form, such as the presence of a condition that prevents usage of the preferred drug or a significant potential drug interaction between another drug and the preferred drug(s) exists. DDI: Cyclosporine will now be non-preferred and require prior authorization if it is currently being used in combination with either Lipitor (doses greater than 20mg/day), Crestor, or lovastatin (doses greater than 20mg). DDI: Cyclosporine will require prior authorization when used with Livalo. DDI: All preferred immunosuppressants will require clinical PA for patients over 60 that are currently on fluoroquinolone therapy. Preferred drugs must be tried and failed due to lack of efficacy or intolerable side effects before non-preferred drugs will be approved, unless an acceptable clinical exception is offered on the Prior Authorization form, such as the presence of a condition that prevents usage of the preferred drug or a significant potential drug interaction between another drug and the preferred drug(s) exists.

Pain Management Policy

Back to Index

Beginning January 2017, all current opiate users who are above the maximum combined daily dose of 100 MME must titrate their total daily dose of opioid medications below 300 MME. Also, the maximum daily supply of an opiate prescription for acute pain will be limited to 7-day supplies. The maximum day supply of an opiate prescription for chronic pain will be limited to 30-day supplies. As of July 1, 2017 all users of opioid medications must comply with the maximum combined daily dose of 100 MME.

However, for MaineCare members, effective January 1, 2017, opioid prescription(s) for more than a 7-day supply and/or more than 30 MME/ day will require a prior authorization. Please note that MaineCare implemented a 30 MME limit January 1, 2013 that is still effective.

The following are general exceptions: pain associated with cancer treatment, end-of-life and hospice care, palliative care, and symptoms related to HIV/AIDS. Per MaineCare criteria, the diagnosis of cancer must be written on the prescription. A palliative care exception for any MaineCare opioid prescription will require prior authorization (PA) with appropriate clinical documentation.

Post-surgical members may receive prior authorizations for opiates up to a 60 days in length if medical necessity is provided by the surgical provider.

An MME conversion chart is available at www.mainecarepdl.org. Click on "General Pharmacy Info."
